

Session Summary

Viewer 095

28 June 1988

SRV

Start: 0930

End: 1030

Site aspects include land (cold, flat, soft, bitter taste), water, structures (dark, cold, empty, big) and man-made land -AOL airstrip- (dark, white, flat, big, open, pulsing). Associated with the open, flat land was bumpy, cool, white, sounds, brown, and something green. The cue target event prompted concepts of motion and energetics. There was a very dedicated individual in coveralls and also a crowd (more than 10) of people who were different from the dedicated individual. At the site was a vehicle, rocks and a pipe. The event involved moving energy, soft (AOL/S almost expanding) and pulsing. See sketches pages three and four
